

Dementia, Level 1: Dementia Capable Caregiving

Program Description

Discover how different types of dementia affect the elderly within the long-term care population. You will learn how to communicate effectively with dementia clients and their families, gain tools to recognize the signs/symptoms of dementia and delirium, how to respond effectively to challenging behaviors, and issues surrounding activities of daily living. You will be required to pass a written examination.

This program meets the 2018 Washington State DSHS-approved mandatory “Dementia Specialty Training” requirement for your caregiving Health Services/ Nursing staff members.
